## About Us

Micro Pro is a leading name in the IT sector of UAE holding multiple projects in a wide spectrum of areas. Our competitive solution packages on Hardware, Software, Networking and Internet have gained us international clientele in each area. The other area we spread our expertise beckons to Physical and Data security, Multimedia and System management solutions for the vibrant business sector in the Middle East.

We team with world IT giants such as Microsoft, Gartner, Oracle, IBM, Cisco, HP, Dell, ATS etc. to empower our technical support. Our portfolio carries all heavy names, Ministry of Public Works and Housing, Dubai Ladies Club, JC Maclean International, Al Aquaria TV ...are some to name.

Our highly qualified technical and marketing brains seldom rest in the process of major face-lifts on Information Technology sector through innovative sparks and molding shapes for the same.

After eight years now since start, we still move with initial vigor and enthusiasm, inventing more reasons to carry the same.

## Integrated Security & Safety Systems

Micro Pro solutions on security and safety systems are mainly viable to Industry sector. We place technology driven Physical Access Control Systems at dynamic business centers, Alarm Settings to detect and warn public at odd happenings, Gate & Parking Automation System etc.

Areas we serve best are:

- Security
- Safety
- Communication

## Security & Safety Systems

Technology today is capable of protecting your assets and information integrating most advanced systems and solutions. Our well-trained

professionals reassure your life-span from all possible threats leak from inefficient security methods.

Our security team designs, supplies, installs and furnishes end-to-end security systems. They also extend outstanding services in delivering best equipments support such systems. Our solutions comprise of indoors-outdoors control, scanners, in-out logging control etc.

We deliver services and equipments in:

### **CCTV (Closed Circuit TV) Surveillance System**

We provide a wide range of camera types & options (fixed/PTZ (Pan,Tilt,Zoom), Indoor/Outdoor, day/night etc to monitor any area under different environments. Our focuses on latest technologies that make Remote Monitoring more efficient consists of Digital Video Recorders/multiplexes that enable viewing and controlling your cameras via the LAN or WAN (Internet). The main brands we cover in this sector are, Pelco (US), Inter-M (Korea) and Proline UK (Korea).

### **Access Control System**

Our Access Control System comprises latest technologies and selected components from global brands in the very industry. We deliver a wide spectrum of Access Control devices equipped with newest technologies such as thumb print, proximity cards etc. Besides, we provide professional locking systems that can be used with any type of doors made of glass, wood, metal etc.

We deliver products from international brands such as Gantner Electronic GmbH (Austria) and Keri Systems Incorporated (US).

### **Intruder Alarm System**

To enhance your security system we can provide you different kinds of sensors to detect any movement or intruder in your home, office, and enterprises. The sensor type includes Glass Break Sensor, Door Opening Sensors, Vibration Sensors, Infrared Beam Sensors etc. When you activate any of these sensors, the Alarm system will also get activated. We provide

you the best products in Intruder Alarm Systems mainly from Proline-UK (Korea).

#### **Gate & Parking Automation System**

Gate barriers, another area we deliver our quality services keenly regulate the access control to your company, villa or parking area. The access will be granted using proximity cards or remote controls for an ease of access. Our Gate Barrier deliverables carry the best label in the industry, CARDIN (Italy).

#### **Fire Detection & Alarm System**

Our Fire Detection & Alarm systems are essential in your business environments. To protect the people in case of fire, you have to detect it first. Our wide range of Fire detectors include Smoke detectors, heat detectors etc. You can also utilize Fire Glass Break Boxes to trigger the alarm manually on such critical circumstances. Our Fire Detection & Alarm system is approved by Department of Civil Defense and is persistently used in many towers and buildings across the country. Our clients rely on the products we deliver from international brands, GENT (UK) and alike.

## Communication Systems

In today's world, communication is the buzzword. Personal and Public interactions demand a wide range of services and products in this arena such as Video conferencing, Telephony PABX systems etc. Keep a pace with the times, Micro Pro evolves in providing solutions and services (software & hardware) in this sector.
