Benefits

Precise Time and Attendance Management

Web Time Track's wisely integrated Time & Attendance applications manage **Multiple Groups, Multiple, Companies, Multiple branches, Multiple Sites and Projects**. It will give you the real-time data of their each punch-in & out instantly. The monitoring personnel at any workstation can track this data of performance online and judge each employee-trade at the core level. Based on these levels, Multiple Reports also can be generated. Web Time Track system esteems as a single source for automating and optimizing the performance of all level projects.

GSM Technology

Web Time Track uses GSM technology in Time & Attendance Terminals offering easy mobility without any additional setup. It is wireless and can be carried to anywhere.

Web Time Track system automates total employee attendance online. The moment they punch in the data will be updated. If the employee misplaces his/her ID card, the supervisor can enter the data. But it is controlled by an additional feature, Audit Report and no malpractices are possible. With an efficient online attendance tracking system like Web Time Track, the company can manage entire workforce of all levels and trades from any remote site monitoring through Internet.

Real-time Information

Web Time Track offers real-time data access the moment, any employee from any remote site punch-in, using GSM technology. It is equipped with Rugged Terminals specially designed for industry needs resisting all weather-

changes. It cuts down many identified problems with Biometric systems in usage now bringing forth latest solutions.

Compatibility

Web Time Track is developed on the cutting edge **.Net technology** and work with Internet and Intranet. It allows Multi-User LAN/WAN support. You can keep tracking your employee performance level from any part of the world through Internet. It is customized to suit your Company needs.

Easy Navigation

All the User Interfaces of Web Time Track are highly user-friendly and easy to handle without any technical advice. In addition, User Manuals and Help files are provided to lead the user independently.

Managing Multiple Shifts

Web Time Track can manage Multiple Groups, Multiple Companies, Multiple Branches, Multiple Sites and Multiple shifts and Trades.

Multiple shifts come under three categories:

Flexible Shifts

Flexible working hours are just meant to track the working hours of Special Grade staff whose productivity rating is more counted than timings. Like, Managers, Consultants etc.

Dynamic Shifts

Dynamic shifts may be Full time or Part time. This is calculated according to the punch-in time of the employee (approximate time of his/her shift-time of that day). And it supports an employee working in Multiple Shifts.

Fixed Shifts

It is a fixed time punch-in and out working pattern. Labors follow this mode and their extra hours should be calculated separately as Overtime.

Web Time Track systematically deals multiple shifts and multiple activities related to each Work-Site (Project) and delivering real-time information using **GSM** technology.

Generating Multiple Reports

Web Time Track's best-in-class Time and Attendance applications manage Multiple Groups, Multiple Companies, Multiple Branches, Multiple Sites and Multiple shifts and Trades. At each level, different activities and employee sections exist. Using this system, you can generate reports on each level employee-performance

Return On Investment (ROI)

Web Time Track saves time and money reducing errors, confronted by the manual data feeding. It replaces the usual format of taking reports at the month-end producing lots of data difference and making exceeding expense for the company.

It is developed on cutting-edge .Net technology and working with Internet & Intranet. The Real-time data accessing using the latest GSM technology make it highly efficient and result-oriented. It allows you to monitor your employees at all level work-flow and generate Multiple Reports. On-line monitoring from any part of the world through website keeps you on the same track of employee-activities wherever you are.
